12 Month Well Baby Questionnaire

Note that "well child visits" are a form of preventative medicine, meant to catch any potential problems in a child's physical or developmental health. Each exam is tailored to the child's age, and may include necessary immunizations, vision, hearing, and developmental screenings. *If your child requires significant medical intervention or you request noteworthy management changes to existing chronic problems during this appointment, this may go above and beyond a preventative exam and may be coded and billed accordingly with your insurance, in which case your financial responsibility may also change.*
